

FUSION PANEL SIZES

CURVED SYSTEM

	WIDTH	HEIGHT
STANDARD ENDCAP	625	2265
STANDARD FRONT	668	2265
STANDARD REAR	838	2265
MINI ENDCAP	550	1985
MINI FRONT	618	1985
MINI REAR	718	1985

FLAT SYSTEM

	WIDTH	HEIGHT
STANDARD ENDCAP	625	2265
STANDARD FLAT	753	2265
MINI ENDCAP	550	1985
MINI FLAT	660	1985

FRONT

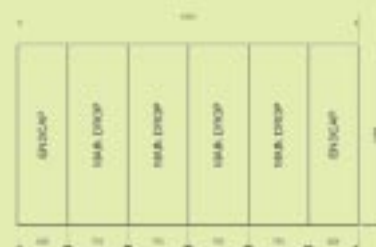

3x4 STANDARD CURVED FRONT PANELS

REAR

3x4 STANDARD CURVED REAR PANELS

3x4 STANDARD FLAT PANELS

Manufacturer's recommendation that 300 micron OPALJET paper (www.kentmere.co.uk) and 100 micron SANDSEAL cold seal be used for optimum mechanical performance of graphic panels.

Artwork as a single page. Please note that endcaps will wrap around to the rear of the structure and will be partially obscured.

All dimensions in millimetres.

the future of pop-up stands
has never looked so good

dimension pop-up

fusion

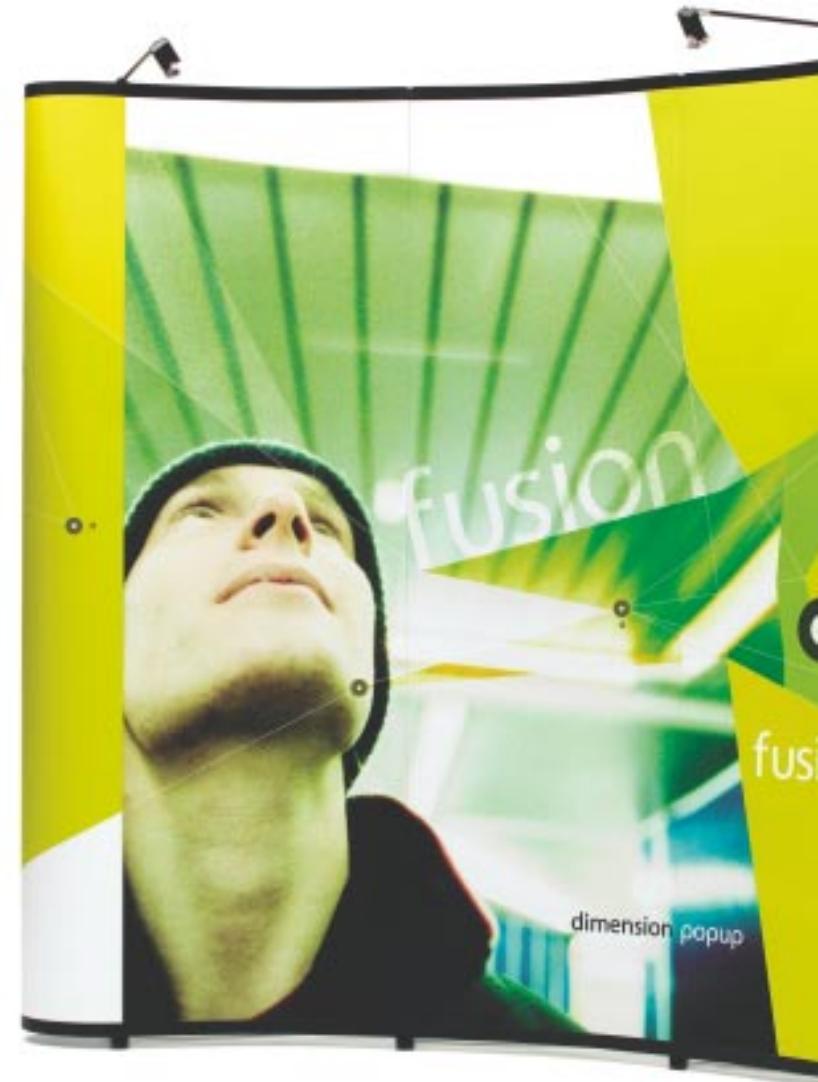

Pop-up display technology has been around for many years and it is an accepted fact that, in terms of delivering a seamless graphic display, it doesn't get any better. Or does it?

The Dimension Group has years of experience in the design and manufacture of world-class display and exhibition systems including pop-ups. And, after much research and development, we are proud to present the next generation in pop-ups – Fusion.

With Fusion we have taken pop-up technology full circle by returning to the basic principles of lightweight, compact and portable design without losing the seamless graphic effect.

We have achieved this through ground-

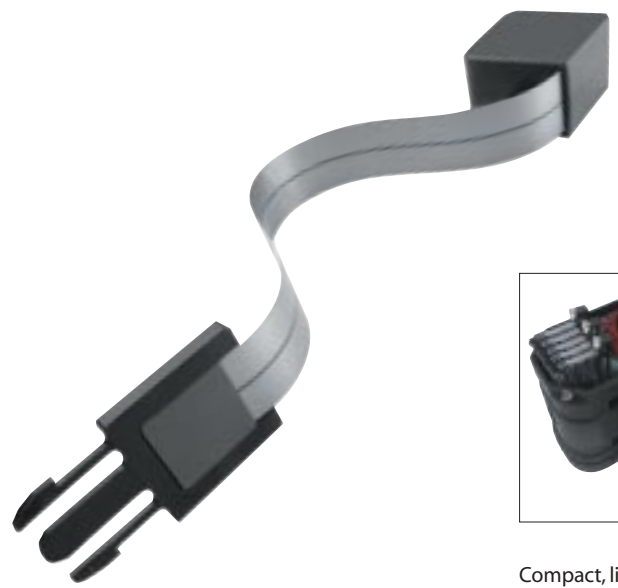

breaking design in the form of a retractable metal band system for magnetically attaching graphic panels to the display structure – replacing the heavy panel hanging bars that other less technologically advanced systems have to use. The retractable band system also eclipses other pop-up systems that claim to require no panel hanging bars. Because with Fusion, the graphic panels are given a stable surface on to which they attach along their entire length - no ripples, bowing or sagging – just perfect graphic delivery!

Pop-ups just got better.

What makes the **Fusion** system unique?

- A complete display kit and graphics that fit in just one case – super-lightweight, super-compact
- Seamless graphics are held perfectly in position by revolutionary metal band application mechanism – no bowing, rippling or sagging
- No separate parts to get lost – Fusion has eradicated the need for panel hanging bars
- Ease of use – build time drastically reduced
- Metal band graphic application system and pop-up structure guaranteed for life

Compact, lightweight and portable. The structure, lights and a complete set of graphics fit into one case which weighs less than any traditional pop-up.

The structure is expanded like any other pop-up.

A combination of fixed and magnetic connectors provide supreme strength and stability.

The tedious process of applying panel hanging bars to the structure is eradicated by simply having to unroll the metal bands from their casing and clipping into the base of the structure.

Main graphic panels are applied as normal and they sit perfectly flush without any sagging or bowing.
End caps applied as normal.
